## EDUCATION

### National University of Computer and Emerging Sciences (FAST-NUCES)

Bachelor of Science in Computer Science

Lahore, Pakistan

Aug 2023 – Jun 2027

- **Relevant Coursework:** Database Systems, Operating Systems, Data Structures & Algorithms, Computer Networks, Natural Language Processing, Object-Oriented Programming, Android Development

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, TypeScript, Java, C++, C, Assembly

**Frontend & Web:** React.js, Next.js, UI/UX Design

**Backend & Databases:** Node.js, Express.js, FastAPI, REST APIs, PostgreSQL

**Tools:** Git, GitHub Actions, Linux (VMs), CI/CD, Jira, Postman

## EXPERIENCE

### Full Stack Development Intern

Jun 2026 – Jul 2026

Zynvex Solutions | Remote

Lahore

- Independently built CampSpark, a full-stack social platform (Next.js, Supabase/PostgreSQL), owning auth, content feed, real-time messaging, and AI chatbot systems solo over 6 weeks.
- Built a RAG chatbot (LangChain.js + Gemini API) retrieving from public and consent-gated private content to generate cited, context-aware responses.
- Implemented Supabase Auth, Google OAuth, JWT sessions, role-based access control, and Supabase Realtime messaging.
- Hit performance targets in production: sub-500ms median API response on core flows, sub-2s feed load time, and sub-5s median RAG chatbot response time.

### Web Development Freelancer

Dec 2025 – Jan 2026

Valsent

- Developed and deployed a university exam prep SaaS platform serving 200+ concurrent users, integrating payment systems and scalable user account management with 99.9% uptime during peak load.
- Configured and maintained backend infrastructure supporting high-traffic educational workflows, resolving 15+ critical deployment issues during the rollout phase.

### Web Development Freelancer

May 2025 – Jul 2025

123Applied

- Architected and deployed a SaaS platform handling secure document uploads for 100+ users, configuring server-side infrastructure, authentication systems, and role-based access controls.
- Built and maintained admin dashboards monitoring live application workflows, reducing manual tracking overhead by ~30% through automated status pipelines.

## PROJECTS

### Celestia | Next.js, Node.js, Express.js, MSSQL, CSS3

- Developed a full-stack education platform for space exploration and social sharing features with responsive frontend. Optimized query performance by 40% for the rapid retrieval of 7,000+ astronomical data points.

### Healthcare Management App | React Native, TypeScript, Firebase

- Developed a mobile app enabling real-time doctor-patient communication across 4 modules (appointments, live chat, video consultations, prescriptions) with Firebase-backed sync supporting sub-200ms response times.

## LEADERSHIP & CERTIFICATIONS

### Infrastructure Officer/Volunteer

Apr 2025

SOFTEC 2025, FAST NUCES

- Managed infrastructure planning and event operations for a large-scale technology event hosting 2500+ participants.

### freeCodeCamp Certification - Back End Development and APIs

Jun 2025
